

## Instructions for Tintex Fabric Dye Fixing Liquid:

After completing the dyeing process and rinsing in cold water, squeeze material to remove excess liquid. Prepare soak bath with warm water sufficient to cover material. Add 10ml Tintex Fixing Agent per 1 litre of water and swirl to mix. Add material, move slowly in soak bath to absorb dye fix evenly. Allow to soak for 10-15 minutes. Remove material and allow to drip dry. Once drip dry heat press material with hot iron or cure in a clothes dryer on heat cycle to cure dye fix.
